	Team player, Proactive	Versioning controls: Git, SVN
	Leadership	Continuous Integration : Jenkin, WIX
Understanding of Java, JavaScript, AngularJS, HTML, CSS, Machine Learning, Bootstrap	Knowledge of FinTech Industry	Office Tools: Word, Excel, PowerPoint

Experience

Indus Valley Partners	Aug 2017 - Present	*Software Engineer*
Nirvana Solutions	Sep 2014 – Jul 2017	*Software Developer*

Key Projects

Projects	Brief
Compliance Engine	Enterprise level service to provide real time financial calculations and trade simulation results
Nirvana Application	Nirvana consolidates and manages data across multiple asset classes, accounts, funds, traders, prime brokers and custodians in a single integrated platform to provide our clients with cloud based OMS, PMS and risk management and reporting solutions.
Continuous Integration	Automated the continuous integration and delivery process as per industry standard practices. Also, implemented client specific customizations post installation.
Polaris Trade Processor	Window application using which bulk trades are processed and stored in a denormalized way for faster retrieval of data.

Responsibilities Undertaken

- Design scalable and business rules driven desktop and web applications
- Coordinating with onshore and offshore team to process clients' requirements.
- Component debugging and performance tuning of applications and database queries.
- Ensure weekly release delivery to the QA team.
- Handle weekly tasks assigned to team and distribute work among other team members based on their knowledge and skills and motivate them to perform better.
